WARRANTY CARD

MULTIBRACKETS™ Limited Warranty
Multibrackets warrants its products to be free of defects in material and workmanship for the product's Warranty Period. The Warranty Period commences on the original purchase date of the product.

All Multibrackets products are covered by a limited product warranty:

- **FIVE (5) years** for metal video monitor mounts; all racks and non-electrical rack accessories
- **TWO (2) years** for gaslifts and sit-stand workstations
- **ONE (1) year** for all motorized and/or automated products, plastic speaker mounts, all speaker stands; all furniture; all wood (MDF) accessories

For warranty claims made during the Warranty Period, MULTIBRACKETS will replace any defective product free of charge. Should a part on your Multibrackets product fail, please create an RMA case on www.multibrackets.com/support to make a warranty claim. We will await your documentation and then discuss the problem with you and once we confirm the product is under warranty, we will ship replacement parts to you. This Limited Warranty does not cover the costs of removing and replacing defective parts from your Multibrackets product. So, if your problem requires a repair technician, you must pay any labor charges.

This limited warranty is void if the product is not purchased from a Multibrackets authorized distributor. If the purchaser of the product is not a Multibrackets authorized distributor, the product is modified in any way, improperly installed, taxed beyond its stated weight capacity or otherwise misused or abused. All Multibrackets products are intended for indoor use only and any

Remote Control Operation Instructions

A. Coding of Remote Control and Control Box

STEP1: When the mount is powered on, press the small button on the control box with a thin tool as shown. The unit will emit a beep, indicating that the control box is on standby for program coding.

STEP2: Press the “**SET**” button on the remote control, and you will hear repeated beeps for approximate 10 seconds indicating that the remote control is being programmed. The unit will emit a beep again indicating success.

Note: Clear up the historical data when replacing a new remote control to pair. Press the small button on the control box with hearing a beep, and hold for 5 seconds to confirm the data-cleaning process is completed until you hear a beep again.

Remote Control Overview

Troubleshooting Guide

In Front

This Troubleshooting Guide will assist you in identifying and solving common problems and answering questions you may have about the product. If the following guides can't help solve the problems, please contact your point of purchase for service and replace the accessories.

1. Error Sound Indication

A. The unit beeps once (when operating the remote control)

This indicates the remote control command is invalid (e.g., the TV mount is at its lowest or highest position). Follow the instructions in the manual to properly operate the mount.

B. The unit beeps twice:

Foreign objects have obstructed the mount from moving. Remove any objects within the range of motion.

C. The unit beeps three times:

- The motor cords were disconnected. Check the connection. Unplug and reinsert the motor cords, then reset the system. If it doesn't work, replace the motor cords.
- The reset process was interrupted. Please strictly follow the instructions to reset the system.

D. The unit beeps four times:

The system may be overheating. Stop operating and allow the TV mount to cool down and remain idle for 18 minutes.

E. The unit beeps five times:

- A voltage abnormality has occurred. Please check the AC adapter. Unplug and reinsert the adapter, then reset the system.
- The weight of the TV may exceed the maximum weight limitation of the mounting system. Please replace the TV with one that meets the weight requirement. Unplug and reinsert the adapter, then reset the system.

F. The unit emits a long beep (when operating the remote control):

The weight of TV may exceed the maximum weight limitation of the mounting system. Please replace the TV with one that meets the weight requirement.

2. Possible reasons motorized mount does not respond to remote control

- The AC/DC end of the power cord may be unplugged/disconnected from the outlet/mount. Check the connection to ensure the unit has power.
- The remote control operating distance may be too far and not in range of the mount. The acceptable range should be less than 30 feet (10m).
- The batteries in the remote control may be low or dead. Replace the batteries.
- The remote control may be broken. Check to see if the indicator LED found on the remote lights when a button is pressed. If so, contact your place of purchase for replacement.
